About me

I am a determined young man, focused on pursuing my goals and seeking a professional environment to enhance my skills. Fascinating cultural and professional growth experiences in other countries have allowed me to better understand cultures and dynamics outside of Italy. Some of my travels include:

- Osaka, Japan
- New York, USA
- London, United Kingdom

These trips, made possible through scholarships, allowed me to improve my English by speaking with native speakers. I am looking for a job that allows me to explore new places and cultures. I am open to remote work or working in other countries.

Laungages

Italian Native language

English B2

Interpersonal and organizational skills

I am very collaborative and enjoy working in a team to develop B2B and B2C products and/or projects. In the past, I have worked with development teams on open-source software and/or private-use software development. I am very familiar with collaboration tools such as Trello and GitHub.

Salvatore Calò

Mobile & Web Developer

Professional experiences

2024 - NOW

Development of Amathia

I am currently working on the development of Amathia, an open-source application to share the culture of Salento.

2023

1st Prize NASA Space Apps Contest

Winning the first prize at the NASA Space Apps Contest 2023, held at the I3P startup incubator in Turin. Teamwork was essential to developing an improvement to the Google Maps route analysis algorithm within 24 hours.

NETWORKING EXPERIENCES

Developer

I also enjoy designing interfaces for both web and mobile applications using Figma and implementing them through code with mobile and web frameworks such as Flutter and React.

In my free time, I love participating in training events such as:

- **Google Events** organized by Google Developer Groups in various regions (Turin, Puglia): During these meetups, I expand my knowledge and stay up to date with the latest technologies and job-related skills.
- **Flutter Heroes:** An event dedicated to Flutter, a technology for developing cross-platform mobile applications. At these events, I often deepen my understanding of packages and framework dynamics to optimize the performance of the apps I develop.
- **Codemotion:** To acquire new skills and/or improve my existing ones. During these events, I network with people working in my field.
- **Sit politico & Sit polimi meeting:** Event dedicated to networking and talk about startup.

Startup challenge

I often participate in challenges organized by public and private entities, where a product must be developed within a set time and then presented to a jury composed of CTOs, CIOs, CPOs, and head engineers.

Education and Training

2018 - 2023 | IISS SALVATORE TRINCHESE

High school diploma

2023 - NOW | POLITECNIC OF TURIN

Bachelor's degree in Computer Engineering
